

MAKING MORE FROM SHEEP, DEER AND BEEF

WITH LESS AND INCONSISTENT RAINFALL

NOVEMBER 14, 15, 16

KEEP AN EYE OUT FOR UPCOMING WORKSHOPS THROUGH ALL OF NZ

Practical information and systems to increase farm profit

Hamish Dickson from AgriPartner Consulting

Hamish Dickson is the Principal Livestock Consultant for AgriPartner Consulting, with over 15 years' experience. Hamish was the co-author of National Guidelines for Intensive Sheep and Lamb Feeding Systems (MLA).

Hamish's presentation will cover:

- Feedlot and containment lot design for farming operations
- Efficient feedlot operation, including induction and animal health matters
- Calculating the income, costs, profit and return on investment of feedlotting

Gerard Roney from Advantage Feeders

Gerard is the Managing Director and initiator of Advantage Feeders. Advantage Feeders currently sells all over the world with branches in six countries. Gerard's presentation will cover:

- Increasing stocking rates during the feed gap by slowing pasture throughput
- Increasing growth rates of young stock by creep feeding to quickly mature the rumen
- Maximising growth rates from improved pasture, crop and Lucerne

Alun Faulkner from Nutritech

Alun has 20 years commercial experience in the animal nutrition industry, with 14 of these years being in New Zealand. Alun has extensive experience in ruminant nutrition segments. Alun's presentation will cover:

- Overview of key nutrients in animal nutrition
- Balancing nutrients in pasture fed animals
- Achieving productivity gains through balanced nutrition

THE DO'S AND DON'TS WITH SETTING UP ON FARM FEED LOTS

REDUCING PASTURE CONSUMPTION DURING THE FEED GAP

GROWING STOCK WHEN PASTURE IS SHORT AND PRICES ARE LOW

CREEP FEEDING FOR HIGHER FEED INTAKE AND EARLY TURN OFF

BETTER MATCH PASTURE CONSUMPTION WITH STOCKING RATES

PASTURE AND CROP ASSIST FINISHING

HOW BEST TO TRAIN STOCK TO FEEDERS

NEW Heavy Duty products on display
